

RAPID RESPONSE SECURITY TRAILER

CLEAR VIEW
ASSET PROTECTION, LLC

PRODUCT DATA SHEET

DESCRIPTION

Compact, telescoping mobile platform that provides reliable power and connectivity in a rapid deployment package to support a multitude of operational tasks, no matter the duration or remote nature of the mission. The customizable security trailer supports advanced surveillance/security systems, critical communication components and drone radar detection technology - just a few examples of the platform's capabilities.

The light-weight, towable nature, small footprint and user-friendly controls of the platform enables set-up by one person in minutes. Making it fast and easy for necessary attributes in emergency incidents and commercial or industrial deployments.

An array of energy-dense power systems support the customized components to include: lithium or AGM battery cells, solar systems and cutting-edge fuel cell generator technology. Rugged components insure reliable operation of systems in harsh environments with wide ranging temperatures.

FEATURES

- Five-stage telescoping tower extends 6.5 feet to 20 feet
- Multiple power systems insure continuity of operations
- Security/surveillance systems that employ the latest components to include advanced artificial intelligence technology
- Multi-platform system integration for ease of monitoring and effective detection of threats, hazards and unwanted situations at numerous locations/sites
- Ability to be deployed quickly and can be set-up for days or months as mission requires
- Mission critical applications for Military, Law Enforcement, Fire Service, Medical Infrastructure, Commercial and Industrial deployments
